

AMENDMENTS TO THE CLAIMS

Please cancel claims 1, 2, 9, 10, and 15-25.

Claims 3, 11-14 and 26-35 were previously cancelled.

1. (Cancelled)
 2. (Cancelled)
 3. (Cancelled)
 4. (Original) A method of lengthening the penis of a male which includes the steps of placing the suspensory ligament under tension in the inferior direction; dividing the suspensory ligament against the body of the symphysis pubis down to the inferior pubic arch and along the inferior surface of both the right and left conjoined inferior pubic rami; effecting suturing to retain the penis released from the suspensory ligament in an inferior position by coapting the proximal medial attachments of the right and left gracilis muscle together ventral the released penis, dividing the fundiform ligaments, drawing the skin of the junction site of the scrotum and the perineum mediosuperiorly so as to attach it to the symphysis pubis thereby pushing the skin adjacent thereto along the newly exposed shaft of the penis and suturing this to retain this position; said method further including the step of following a post operative treatment regime.
 5. (Original) The method of Claim 4 followed by the insertion of additional sutures through the anterior surface of the symphysis pubis; said sutures also placed through the margins of the pubic skin wound and tied in such a manner as to pull suprapubic skin down infrapubically.
 6. (Original) The method of Claim 5 wherein the number of said additional sutures inserted is 1 or more.
 7. (Original) The method of Claim 6 wherein the number of said additional sutures is determined by the width of the symphysis pubis.
 8. (Previously Presented) The method of Claim 4 including the step of dividing the fundiform ligament prior to said step of drawing the skin of the junction site of the scrotum.
- Claims 9-35 (Cancelled)
